## **DETAILED ACTION**

### ***Response to Amendment***

1. In response to applicant's amendment received on 3/9/2011, all requested changes to the claims have been entered.

### ***Response to Argument***

2. Applicant's arguments filed on 3/9/2011 have been considered but they are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 10-30 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

With respect to claim 10, 13 and 14, no where in the specification describe “partitioning a whole area of the transformed image to be obtained by a projection transformation of the original image into a plurality of regions, wherein none of the regions is intersected by any of two mutually perpendicular axes that extend in a plane containing the transformed image and pass through an origin of the whole area, at least one of the regions has a side of the region defined by one of the axes”, paragraph [0010] and [0013]-[0015] describe “partitioning an image”, but no , no where in the specification describe above limitation.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 10-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to "partitioning" limitation in claim 10, 13 and 14, it is not clear what “none of the regions is intersected by any of two mutually perpendicular axes that extend in a plane containing the transformed image and pass through an origin of the whole area, at least one of the regions has a side of the region defined by one of the axes” means.

***Conclusion***

1. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
